

# PLM Fleet is The Nation's Largest Technology-Driven Fleet Management Company Dedicated Exclusively to the Cold Supply Chain

With our comprehensive fleet management approach, PLM Fleet focuses on creating flexible and customer-specific solutions to reduce costs and drive productivity for businesses nationwide. Located in the state-of-the-art fleet solutions center in Newark, NJ, PLM is recognized as the only nationwide company that is dedicated exclusively to the leasing, renting, and full-service maintenance of over 13,000 refrigerated trailers.

# PLM Fleet Products

## Rental

Versatile equipment to meet your specific demands.  
With 32 locations, we are in all the key markets nationwide.

- 28', 36', 48' and 53' lengths, ST, MT and TT, and versatile liftgate options
- Rent daily, weekly, or month to month
- Routine, seasonal and emergency rentals
- Drop off service
- All-electric units
- Make rental reservations online at MyPLM

## Lease

Whether it is a long-term new build asset or versatile short-term in-fleet equipment, you can be assured it will be designed to fit your business needs.

- Customized full service or net leasing options
- Walk away with no residual risk of disposition costs
- In-depth analysis of your business to advise on your business's alternative asset-based funding options and a managed replacement plan

## Maintenance

Every rental comes with on-site mobile emergency break-down and preventative maintenance programs.

- 24/7 emergency breakdown service
- Pick up or drop off service
- Our mobile service comes to you
- An extensive network of service operators

## Zero Emissions

We have the only California state approved refrigerated units for multi and single temperature applications.

- Lithium batteries, solar panels and momentum generator will provide 30 hours of run time
- Site evaluation and infrastructure deployment
- Applications and design team to spec the trailer to your needs
- Support with public, private, state and federal programs
- Maintenance support and telematics reporting

Real time GPS telematics and temperature tracking. This trailer management tool allows visibility into key performance indicators.

- Alarms
- Dwell time
- Temperature
- Utilization
- Routes Driven

A cloud-based IoT platform for cold chain traceability at the case level, to save you time and money.

- Labor management
- Loss prevention
- Inventory controls
- Support your sustainability efforts with reduced food, fuel and packaging waste
